With a comprehensive dedicated obesity centre, we at AB Plus bring you a positive experience for your well-being. We are equipped to care for even the most critically obese patients, and have navigated successfully through many difficult and challenging cases.

AB Plus takes their commitment to overall healthcare one step further by introducing AB Plus Health Lounge at Ahmedabad Airport for a 10 minute Comprehensive and Non Invasive Full Body Health Scan for preventive health.

 **AB Plus**
Health Lounge
Timely Health Checkup

India's fastest, most comprehensive health checkup.

Find us right after the
check in at
Ahmedabad Airport,
and make the right
choice for your health
with just 10 minutes of
your time!

In your day to day rush, it is hard to find time to get a health check up done, and often grave problems go unnoticed. To solve this problem, we bring to you AB Plus Health Lounge, for a Check Up after you Check In.

Spend your waiting time doing something productive for your well-being. The ten minutes of your time that you give us today could give you a few more years of your life. In ten minutes, we can analyse your in-body muscle, water and overall cellular health, and the best part is – these procedures are 100% non-invasive, without a single needle or a blood sample.

Before Take Off, Take Charge of your Health!

With some basic procedures,
you will be surprised how much
we can find out about your body!
Our services include

Automated Eye Scan

An eye scan with built in AI helps detect diabetes, cataracts and hypertension. A simple test can help save you from a lifetime of problems, if such problems have gone undiagnosed. In future, Google Eye / Apple Eye will be able to predict illnesses, with the pictures by AI technology.

Body Composition Analysis

We go deeper than just checking your BMI, we check your fat muscles, water content and segmental muscle analysis report. Anomalies in these tests can give an indication of underlying problems that you were never aware that you had. Every Indian is thin / fat. Being thin does not mean you are healthy. Changing your body composition can help avoid many illnesses, including diabetes and hypertension.

Cardiovascular Screening

Your heart holds the secret to a lot of problems in your body. With a simple screening for some cardiovascular insights, we can unveil these secrets and help you manage your health pro-actively.

Face Skin Analysis

Based on 12 parameters of face skin, we can provide you with recommendations for each parameter and how to manage them. A thorough assessment of the condition of your face skin will help us guide you towards the right skincare choices and anti-ageing. This is the most important tool for anti-ageing.

Foot Pressure Analysis

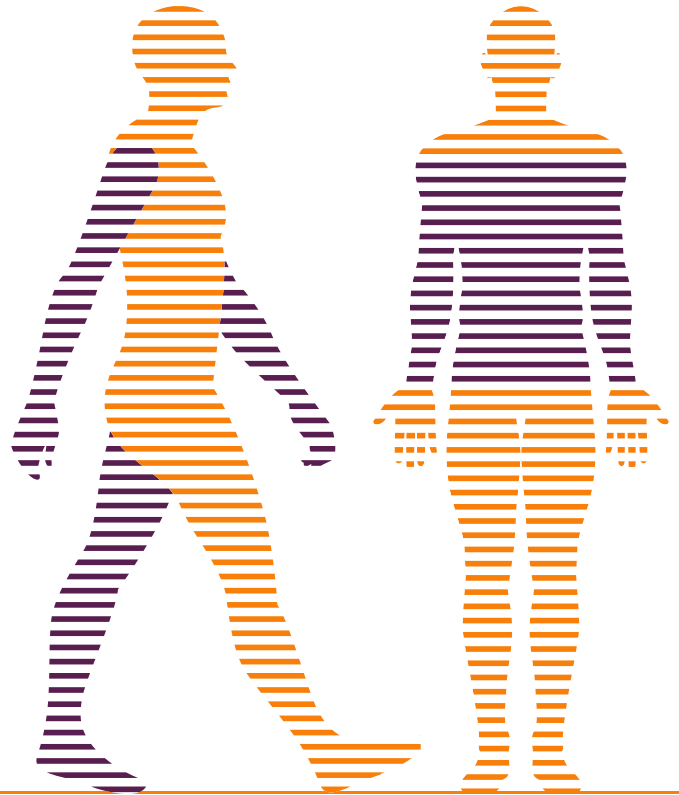

Foot Pressure Analysis report will give your body posture analysis & pressure points which may develop spinal & joint pain. By this test we will be able to know on which part of foot body weight is transmitting more. We can prevent knee pain / spine pain.

Hair & Scalp Analysis

- ✦ Hair loss status
- ✦ Hair density
- ✦ Scalp condition
 - Keratin of scalp
 - Scalp blood supply
 - Hair thickness
 - Hair pore status

**Just spend
10 minutes with us,
and buy yourself
a lot more time.**

⊕ 10 Minutes Survey

⊕ 100% Non Invasive

With our quick and convenient assessment that takes just 10 minutes, and is completely non-invasive, we can catch potential issues early on, saving you time, worry, and potential bigger health problems down the road.

All we ask is, take a moment, and give yourself these 10 minutes.

**Walk past? Or walk in?
The difference is
a longer, healthier life.**

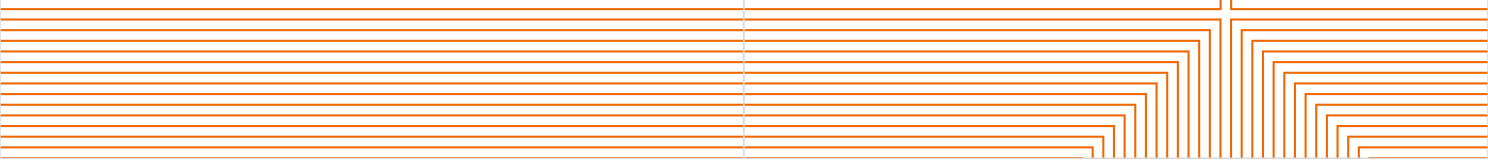

See you
right after
check in at
Ahmedabad
Airport!
